

Selection of Preliminary Service Responses: The Views of Three Groups of Stakeholders

The table below represents the top rated responses of three different groups. The choices are presented here in alphabetical not priority order.

Our next step, after establishing the priorities will be for the staff and board to develop a strategic plan with effective goals, objectives, and outcomes. Resources (space, staff, collections, and technology) will be reallocated. The amount of our resources will determine how many priorities we can effectively achieve over the next three years.
